Telefax/Courier

Dear Mr. Vice President:

Your words to George Stephanopoulos on ABC's This Week resonated with the American populace. It was an excellent follow-up to the celebratory airtime generated by Our Nation's Birth on the 4<sup>th</sup> of July.

It was particularly gratifying to hear you speak of the importance to the economy of High Speed Rail, and updated electrical grids. As you know, that topic is near and dear to the heart of any engineer... myself included. And, you are absolutely right, Mr. Vice President. High Speed Rail and the new electric grids will have an immediate and positive impact on America's economic problems, and national recovery.

As President Obama, yourself, and your Administration recognize, unemployment is a key issue - but ecological impact and state tax revenue issues are also key. Both of these items will feed the positive result of the construction process of High Speed Rail and electrical grids. Thus, it must be carefully planned and executed with expertise gained only from experience.

It is time to turn your words of Hope into reality, and I look forward to working with you and President Obama to do just that. As part of your economic recovery team, we will make it a priority to provide you with vital information about the progress of High Speed Rail construction, and electrical grids. You can also count on us to provide data on the ways in which the construction helps solve the problems on which your Administration is so diligently working... e.g., increased taxes paid into local and state treasuries, etc. Hopefully, our participation will help you keep the people informed about the progress you make in providing solutions to inherited problems.

Thank you for recognizing the importance of High Speed Rail and electrical grids to our economic recovery.

Sincerely,

  
Ambassador Lee Emil Wanta

## Detailed History & Intel Report about the New Republic & Global Currency Reset

[inteldinarchonicles.blogspot.com](http://inteldinarchonicles.blogspot.com)

### **Federal Reserve to New US Republic via a Global Currency Reset**

The Global Currency Reset is a complicated process about a global reset of currencies, removal of the Khazarian mafia and restoration of the US Republic and the original US Constitution. At present the process is playing out with no holds and is expected to be completed within days.

Below is a history of that process, including forming of the US New Republic, integration of the Federal Reserve into the new US Treasury in Reno, expected changes in the US tax system, expected release of the 800 numbers and relationship of Humanitarian Projects to \$800 trillion in US taxpayer monies gained from a 1992 audit of the Federal Reserve.
